

The plot displays the ratio of fake+duplicates rate versus track d_{xy} (cm). The x-axis ranges from -25 to 25 cm, and the y-axis (Ratio) is on a logarithmic scale from 0.95 to 0.8. Data points are shown for various track d_{xy} values, with vertical error bars. The ratio generally decreases as track d_{xy} increases, with a notable peak around 10 cm.
