Figure 1 consists of two vertically stacked panels sharing a common x-axis labeled 'TP' ranging from -3 to 3. The top panel's y-axis is 'Reconstructed TPs' on a logarithmic scale from 10 to 100. It displays data points with vertical error bars, showing a general trend that increases with TP. The bottom panel's y-axis is 'Ratio' on a linear scale from 0.95 to 1.05. It shows the ratio of reconstructed to true TPs, with data points and error bars clustered around a horizontal line at Ratio = 1.0. A shaded region is visible in the bottom right corner of the bottom panel.
