

Figure 1 is a log-log plot showing the ratio of take+duplicates vs. track ref. point r (cm). The x-axis ranges from 10^{-2} to 10^2 cm, and the y-axis ranges from 0 to 1.0. The data points are represented by black circles with vertical error bars. A red line indicates the ratio of 1.0. The ratio is approximately 1.0 for $r < 10^{-1}$ cm and decreases to approximately 0.1 for $r > 10^{-1}$ cm.
