

Fake rate vs dxy

Duplicates Rate vs Dxy

Pileup rate vs dxy

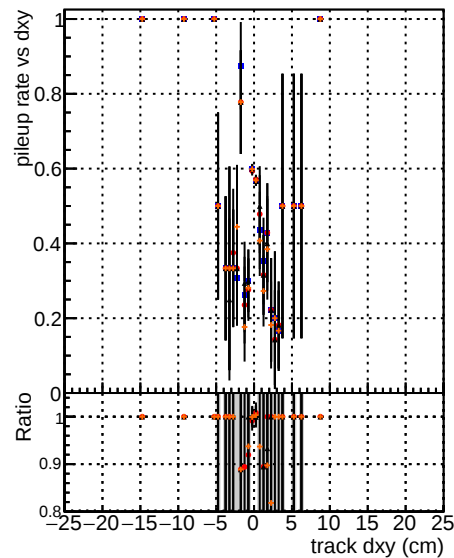

Figure 1: Fake rate vs d. The plot shows the fake rate for various models and datasets as a function of d. The y-axis represents the fake rate, and the x-axis represents d. The legend identifies the following series: DOM (blue square), mkFit (red circle), TT (green triangle), original (black diamond), JanUpdate (orange star), noErr (purple plus), statErr (brown cross), and sysErr (grey asterisk). The 'original' model shows the highest fake rate, while 'mkFit' shows the lowest. The 'noErr' and 'statErr' series are also shown, but they are not clearly visible in the plot.
