

The figure displays two histograms side-by-side. The left histogram is labeled "Fake rate vs. DQM T1 MS" and has a y-axis scale from 0 to 1.0. The right histogram has a y-axis scale from 0 to 10. Both histograms show two distinct peaks: a sharp peak at low values and a broader peak at higher values. The x-axis for both is labeled "DQM T1 MS". The right histogram is labeled with "det0-dpdq" above the first peak and "detQ-chi2" below the second peak.
