

N of reco track vs pT

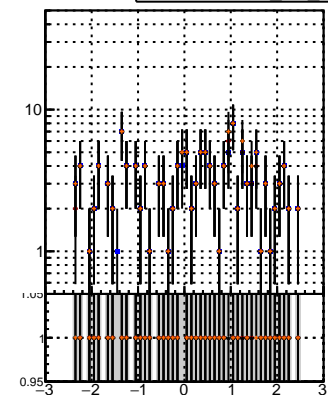

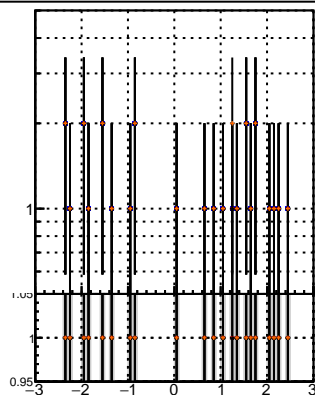

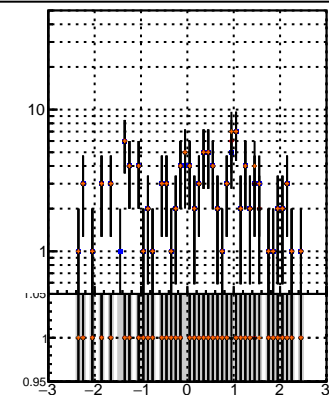

N of associated (recoToSim) tracks vs pT

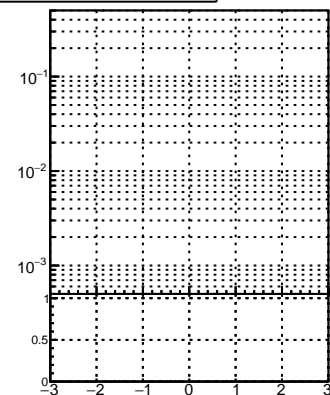

N of associated (recoToSim) duplicate tracks vs pT

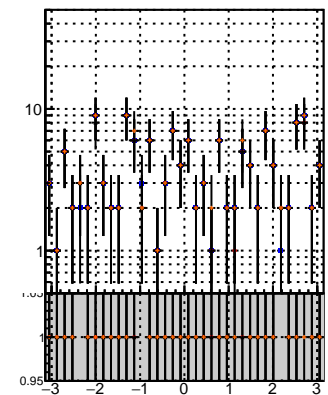

The diagram illustrates the detector layout for the N of reco track vs e. It shows a series of components: DQM, TT, MS, detT, detL1, and detTb9. The components are arranged in a row, with DQM, TT, and MS being the largest. The components are connected by lines, indicating a sequential flow. The components are labeled with their respective names: DQM, TT, MS, detT, detL1, and detTb9.
