

The figure consists of two vertically stacked plots. The top plot has a logarithmic y-axis labeled 10^2 and an x-axis ranging from -25 to 25. It shows a sharp peak at 0 nodes. The bottom plot has a linear y-axis ranging from 0.95 to 1 and an x-axis ranging from -25 to 25. It also shows a sharp peak at 0 nodes.

Figure 1 consists of two vertically stacked plots. The top plot shows the probability distribution of the number of nodes in the largest component, with a sharp peak at 0. The bottom plot shows the probability distribution of the number of nodes in the second largest component, also with a sharp peak at 0.
