

N of reco track vs pT

N of associated (recoToSim) tracks vs pT

N of associated (recoToSim) duplicate tracks vs pT

The diagram illustrates the detector layout for the N of reco track vs e. It shows a series of components: DQM, TT, MS, detT, detL1, and detTb9. The components are arranged in a sequence, with DQM and TT being the first two, followed by MS, detT, detL1, and detTb9. The components are represented by different symbols: DQM is a rectangle, TT is a circle, MS is a square, detT is a triangle, detL1 is a diamond, and detTb9 is a hexagon. The components are connected by lines, indicating the flow of data or the sequence of operations.
