3	DQM_mkFit_TTNEWHSMS-improved

Number

Figure 1 is a plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.9 to 10^2 on a logarithmic scale. The x-axis lists 18 methods: generalTracks, individualStep, deepQuasiStep, generalTripleStep, deepQuasiStep, detachedTripleStep, triplePairStep, nestedTripleStep, triplePairStep, nestedTripleStep, triplePairStep, nestedTripleStep, triplePairStep, nestedTripleStep, triplePairStep, nestedTripleStep, triplePairStep, nestedTripleStep, and DuplicateMin. A horizontal line is drawn at Ratio = 1.0. The 'DuplicateMin' method shows a significantly higher ratio, around 100, while all other methods are clustered around 1.0.

Number of pileup tracks vs collection
