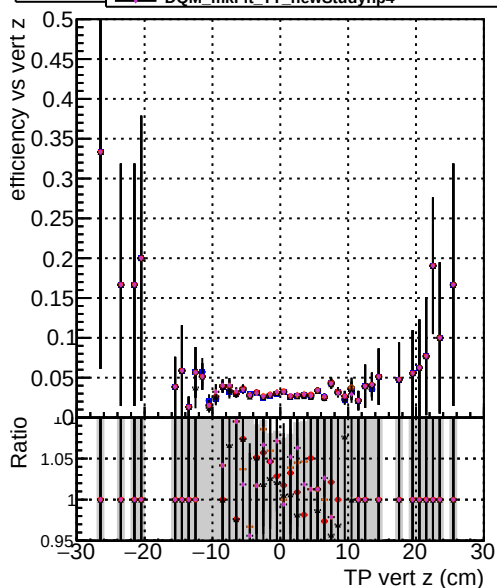

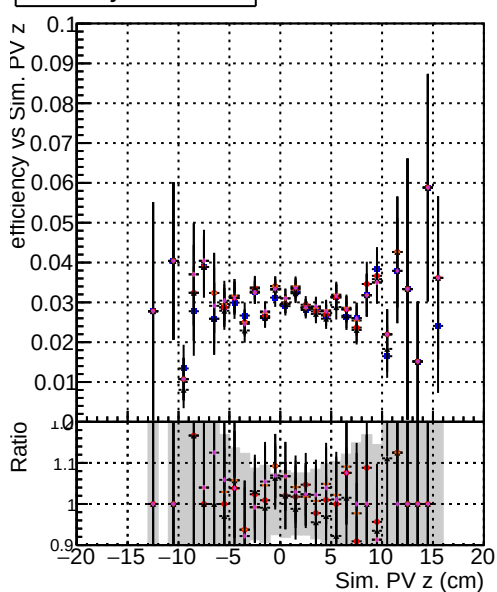

Figure 1 consists of two panels. The top panel shows the ratio of take+duplicates vs. z (y-axis, 0.1 to 0.8) versus track ref. point z (cm) (x-axis, -30 to 30). The bottom panel shows the ratio (y-axis, 0.95 to 1.0) versus track ref. point z (cm) (x-axis, -30 to 30). Both panels show data points with error bars and a shaded region representing the 1-sigma uncertainty.
