

Number of tracks vs collection

Number of true tracks vs collection

Number	Legend
1	DQM_mkFit_TT_pLW
2	DQM_mkFit_TT_pLW IMP

Figure 1 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.9 to 10^5 on a logarithmic scale. The x-axis lists 20 methods: GeneralTracks, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, IntraStep, and IntraStep. The methods are grouped into three categories: GeneralTracks (grey bars), IntraStep (white bars), and InterStep (light grey bars). The top part of the plot shows the 'Duplicate tracks' (y-axis from 10^3 to 10^5) and the bottom part shows the 'Ratio' (y-axis from 0.9 to 1.0). The ratio is generally close to 1.0, indicating that the methods are performing similarly in terms of duplicate tracks.

Number of pileup tracks vs collection
