

Efficiency vs Dxy(PV)

fake+duplicates vs dxy(PV)

Efficiency

Figure 1 consists of two vertically stacked panels sharing a common x-axis labeled 'track dxy(PV) (cm)' ranging from -1 to 1. The top panel shows the 'fake+duplicates rate vs dxy(PV)' on the y-axis, ranging from 0.1 to 0.8. It displays three data series: black circles, red circles, and blue circles, all with vertical error bars. The rates fluctuate between approximately 0.35 and 0.55. The bottom panel shows the 'Ratio' on the y-axis, ranging from 1.0 to 1.6. It displays the same three data series (black, red, and blue circles with error bars) and a grey shaded band representing the 1-sigma uncertainty. The ratios are mostly between 1.0 and 1.4.
