Figure 1 is a log-linear plot showing the ratio of duplicate tracks between different steps of the pipeline. The y-axis is labeled 'Ratio' and ranges from 0.95 to 10⁵ on a logarithmic scale. The x-axis lists 16 steps: generalTracks, initialTracks, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep, initialStep. The plot shows that the ratio is generally close to 1.0, with some steps showing higher ratios (up to 10⁵) and others showing lower ratios (down to 0.95).

Number of pileup tracks vs collection
