

Figure 1 is a plot showing the ratio of duplicate tracks for two methods, HEC and HEC+powerTEC, across different power levels. The y-axis is labeled 'Ratio' and ranges from 0 to 1.5. The x-axis is labeled 'duplicate tracks' and has two categories: 'HEC' and 'HEC+powerTEC'. The plot shows that the ratio of duplicate tracks is significantly lower for HEC+powerTEC compared to HEC, especially at higher power levels.
