

N of reco track vs dxy

N of associated (recoToSim) tracks vs dxy

N of associated (recoToSim) looper tracks vs dxy

N of reco track vs dz

N of associated (recoToSim) tracks vs dz

Figure 10 is a scatter plot showing the ratio of fake tracks to total tracks as a function of track dz (cm). The y-axis is labeled 'Ratio' and is on a logarithmic scale from 0 to 1. The x-axis is labeled 'track dz (cm)' and ranges from -30 to 30. The data points show a high ratio (near 1) for dz values between approximately -10 and 10 cm, and a much lower ratio (around 10^{-3}) for dz values outside this range.
