Figure 10 is a log-linear plot showing the ratio of duplicate tracks between different methods. The y-axis is labeled 'Ratio' and ranges from 0.6 to 10^5 on a logarithmic scale. The x-axis lists 15 methods: generalTracks, QuadStep, RightPTT, RightPTTQuadStep, AttachedPTT, AttachedPTTQuadStep, DetachedPTT, DetachedPTTQuadStep, MixedPTT, MixedPTTQuadStep, TripleStep, TripleStepQuadStep, PseudoSeeds, PseudoSeedsQuadStep, and PseudoSeedsRegionStep. A horizontal line at Ratio = 1.0 indicates equal duplicate counts. Methods above the line (e.g., generalTracks, QuadStep, RightPTT, AttachedPTT, AttachedPTTQuadStep, DetachedPTT, DetachedPTTQuadStep, MixedPTT, MixedPTTQuadStep, TripleStep, TripleStepQuadStep) have more duplicate tracks than those below the line (e.g., PseudoSeeds, PseudoSeedsQuadStep, PseudoSeedsRegionStep). Error bars are shown for each data point.

Number of pileup tracks vs collection
