

Number of tracks vs collection

Number of true tracks vs collection

Number DQM_TT_mkFit-DQM_original-127
 DQM_TT_mkFit-DQM_updated-127

The figure consists of two vertically stacked plots sharing a common x-axis representing different processing steps.

- Top Plot:** The y-axis is labeled "Duplicate tracks" on a logarithmic scale from 10^0 to 10^5 . Data points are shown as black dots with vertical error bars. The values generally decrease from left to right, starting around 5×10^4 for "GeneralTracks" and ending near 10^0 for "NonSeedsStep".
- Bottom Plot:** The y-axis is labeled "Ratio" on a linear scale from 1.0 to 1.4. Data points are shown as grey bars with black error bars. Most ratios are close to 1.0, with some variation between 1.0 and 1.3 across the steps.

Number of pileup tracks vs collection
