

Figure 1 consists of two panels. The top panel shows the distribution of 'duplicate tracks' (y-axis, 10<sup>2</sup>) versus 'track min ΔR' (x-axis, log scale from 10<sup>-3</sup> to 1). The bottom panel shows the 'Ratio' (y-axis, 1 to 4) versus 'track min ΔR' (x-axis, log scale from 10<sup>-3</sup> to 1). Both panels show a dense distribution of points with a central peak around 10<sup>-2</sup>.
