Figure 1 is a log-linear plot showing the ratio of duplicate tracks for various track types. The y-axis is labeled 'Ratio' and ranges from 0.95 to 100 on a logarithmic scale. The x-axis lists the track types: generalTracks, individualStep, stepQuadruple, higherTripletsStep, detachedTripletsStep, triplePairStep, mixedTripletsStep, tripletsLessStep, tripletsCoreStep, regionsStep, nonRegionsStep, duplicateMinStep, duplicateMaxStep, and duplicateOutStep. The plot shows that most track types have a ratio near 1.0, while 'generalTracks' has a significantly higher ratio around 150. Error bars are shown for each data point.

Number of pileup tracks vs collection
