

The figure shows a plot of fake rate versus two different DQM metrics. The x-axis is labeled "Fake rate vs." and the y-axis is unlabeled. Two data series are plotted: "DQM\_TT\_mkFit-DQM\_original" represented by a blue square marker and "DQM\_TT\_mkFit-DQM\_modified" represented by a red circle marker. Both series show a decreasing trend as the x-axis value increases.
