

Fake rate vs dxy

Duplicates Rate vs Dxy

Pileup rate vs dxy

Fake rate vs d

The plot displays the fake rate as a function of distance d for several different models. The y-axis represents the fake rate, ranging from 0.0 to 1.0. The x-axis lists the models: DOM V0001, B00000000001, Global emssw, REGO Original RECO, Global emssw, MKFitOriginal RECO, Global emssw, and MKFitNew05 RECO. A legend indicates four data series: red (top), blue (middle-top), black (bottom), and orange (bottom-most). The fake rates generally decrease as d increases.
