

Number of tracks vs collection

Number of true tracks vs collection

Number

Figure 1 is a log-log plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.95 to 10^5 . The x-axis lists 16 methods: GeneralTracks, InitialStep, TopStep, HighPTTripleStep, TopPTTripleStep, DetachedTripleStep, DetachedQuadStep, PileupTripleStep, MixedTripleStep, TopLessStep, CoreStep, RegionStep, MissedSeedStep, RegionSeedStep, and RegionStep. A horizontal line at Ratio = 1 indicates the baseline. Data points are shown as black dots with error bars. Methods with ratios significantly above 1 are: GeneralTracks, InitialStep, TopStep, HighPTTripleStep, TopPTTripleStep, DetachedTripleStep, DetachedQuadStep, PileupTripleStep, MixedTripleStep, TopLessStep, and CoreStep. Methods with ratios near 1 are: GeneralTracks, InitialStep, TopStep, HighPTTripleStep, TopPTTripleStep, DetachedTripleStep, DetachedQuadStep, PileupTripleStep, MixedTripleStep, TopLessStep, CoreStep, and RegionStep. Methods with ratios significantly below 1 are: MissedSeedStep, RegionSeedStep, and RegionStep.

Number of pileup tracks vs collection
