

Figure 1 is a log-linear plot showing the ratio of duplicate tracks to total tracks as a function of track χ^2 . The y-axis is labeled 'Ratio' and is on a logarithmic scale from 0 to 0.1. The x-axis is labeled 'track χ^2 ' and is on a linear scale from 0 to 20. The data points show a sharp drop in the ratio at $\chi^2 = 0$, followed by a plateau around 0.01 for χ^2 values greater than 2.
