--	---

Figure 1 is a log-log plot showing the ratio of duplicate tracks for various steps in the workflow. The y-axis is labeled 'Duplicate tracks' and ranges from 10^0 to 10^5 . The x-axis is labeled 'Ratio' and ranges from 0.9 to 1.05. The plot shows that the ratio of duplicate tracks is generally high (around 10^4 to 10^5) for most steps, except for 'InitialStep' and 'FinalStep' which are around 10^1 . The 'Ratio' values are mostly close to 1.0, with some steps showing a slight increase (e.g., 'InitialStep' at ~1.05, 'FinalStep' at ~1.02).

Number of pileup tracks vs collection
