

Efficiency vs pixel layer

Plot of efficiency vs pixel layers. The y-axis is 'efficiency vs pixel layers' (0.0 to 0.05) and the x-axis is 'TP pixel layers' (0 to 8). Data series include DQM_TT_mkFit-DQM_old132 (blue circles), DQM_TT_mkFit-DQM_new132 (red circles), and DQM_TT_mkFit-DQM_newfast132 (black circles). A horizontal line is at Ratio = 1.0. A shaded gray region is at the bottom.

fake+duplicates rate vs pixel layers

Plot of fake+duplicates rate vs pixel layers. The y-axis is 'fake+duplicates rate vs pixel layers' (0.0 to 0.5) and the x-axis is 'track pixel layers' (0 to 8). Data series include DQM_TT_mkFit-DQM_old132 (blue circles), DQM_TT_mkFit-DQM_new132 (red circles), and DQM_TT_mkFit-DQM_newfast132 (black circles). A horizontal line is at Ratio = 1.0. A shaded gray region is at the bottom.

Efficiency vs 3D layer

Plot of efficiency vs 3D layers. The y-axis is 'efficiency vs 3D layers' (0.0 to 0.1) and the x-axis is 'TP 3D layers' (0 to 20). Data series include DQM_TT_mkFit-DQM_old132 (blue circles), DQM_TT_mkFit-DQM_new132 (red circles), and DQM_TT_mkFit-DQM_newfast132 (black circles). A horizontal line is at Ratio = 1.0. A shaded gray region is at the bottom.

fake+duplicates rate vs 3D layers

Plot of fake+duplicates rate vs 3D layers. The y-axis is 'fake+duplicates rate vs 3D layers' (0.0 to 0.8) and the x-axis is 'track 3D layers' (0 to 20). Data series include DQM_TT_mkFit-DQM_old132 (blue circles), DQM_TT_mkFit-DQM_new132 (red circles), and DQM_TT_mkFit-DQM_newfast132 (black circles). A horizontal line is at Ratio = 1.0. A shaded gray region is at the bottom.
