Figure 1 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.8 to 10² on a logarithmic scale. The x-axis lists 16 methods: GeneralTracks, InitialStep, HighPairStep, HighTriStep, HighQuadStep, HighTriStep, HighQuadStep, HighTriStep, HighQuadStep, HighTriStep, HighQuadStep, HighTriStep, HighQuadStep, HighTriStep, HighQuadStep, HighTriStep, and HighQuadStep. The 'GeneralTracks' method has a ratio of approximately 1.1. The other methods have ratios clustered around 40-50, with error bars indicating variability.

Number of pileup tracks vs collection
