Figure 10 is a log-linear plot showing the ratio of duplicate tracks to the total number of tracks for various datasets. The y-axis is labeled 'Ratio' and ranges from 0.8 to 10^2 on a logarithmic scale. The x-axis lists the datasets: General, Imbalance, WPI, OAS, and TREC. For each dataset, a grey shaded area represents the range of ratios, and a red cross marks the mean ratio. The 'General' dataset has a mean ratio around 40, while the other datasets have mean ratios near 1.0.

Number of pileup tracks vs collection
