

Number of tracks vs collection

Number of true tracks vs collection

DQM_V0001_R000000001_Global_CMSSW_X_Y_Z_allNODNN

Number	DOM	V0001	R0000000001	Global	CMSSW	X	Y	Z	all
--------	-----	-------	-------------	--------	-------	---	---	---	-----

Figure 1 is a log-log plot showing the ratio of duplicate tracks for various steps in the Hi-C data processing pipeline. The y-axis is labeled 'Ratio' and ranges from 0.95 to 10,000. The x-axis lists the steps: generateTracks, filterTracks, filterPairsStep, filterTripletStep, filterLessStep, filterRegionStep, filterSeedsStep, and filterPairsStep. Each step has a red dot representing the ratio and a vertical grey bar representing the error range. The ratios are generally close to 1.0, with some steps showing higher ratios (e.g., filterTracks at ~10,000).

Number of pileup tracks vs collection
