

Figure 10 is a plot showing the fake duplicates rate (top y-axis, 0 to 0.05) and the ratio (bottom y-axis, 0.95 to 1.0) as a function of track dxy (x-axis, -25 to 25 cm). The plot features a vertical line at dxy = 0, indicating the region of interest. Data points are shown as red squares and circles, with a shaded gray band representing the uncertainty.
