

pull of  $p_t$ 

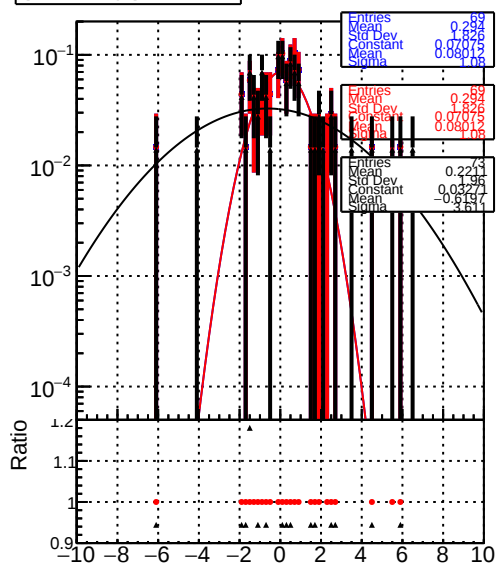

pull of qoverp parameter

Legend: Global (black), mFit (red), CAND-adjusted (blue). The plot shows the distribution of pull values for three different fit scenarios: Global (black), mFit (red), and CAND-adjusted (blue). The x-axis ranges from -10 to 10, and the y-axis (Ratio) is on a log scale from 10^-4 to 10^-1. A red arrow at the bottom indicates the pull of the CAND parameter.

pull of  $\phi$  parameterpull of  $\theta$  parameter

pull of dxy parameter

pull of dz parameter
