Figure 10 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 0.95 to 10³ on a logarithmic scale. The x-axis lists 16 methods, grouped into three categories: 'general' (first 4 methods), 'specific' (middle 4 methods), and 'core' (last 8 methods). Each method has a red dot representing the ratio and a vertical error bar. The 'general' methods show ratios significantly above 1.00, while the 'specific' and 'core' methods are closer to 1.00.
