

Figure 10 is a plot showing the ratio of the efficiency of the TP to the efficiency of the TO as a function of the TP dxy (cm). The x-axis ranges from -25 to 25 cm, and the y-axis ranges from 0.95 to 0.01. The ratio is plotted for two different TO dxy values: 0.5 cm (red points) and 1.0 cm (orange points). The ratio is approximately 1.0 for both values, indicating that the efficiency of the TP is similar to the efficiency of the TO.
