		DOM	V0001	R0000000001	Global	mkFitOPT	RECO

Figure 1 consists of two vertically stacked plots sharing a common x-axis labeled 'TP' ranging from -3 to 3. The top plot shows 'Reconstructed TPs' on a logarithmic y-axis from 1 to 10. It displays data points with vertical error bars and a shaded region representing the 1-sigma uncertainty. The bottom plot shows the 'Ratio' of Reconstructed TPs to True TPs on a linear y-axis from 0.95 to 1.05. It displays data points with vertical error bars and a shaded region representing the 1-sigma uncertainty. Both plots show a clear trend where the ratio and reconstructed values deviate from the true values as the true values move away from zero.
