Figure 1 is a log-linear plot showing the ratio of duplicate tracks for various methods. The y-axis is labeled 'Ratio' and ranges from 1 to 10^2 on a logarithmic scale. The x-axis lists 16 methods: generalTracks, initialStep, stepPCQuadStep, stepP1TripletStep, stepP1TripletStep, detachedQuadStep, detachedTripletStep, triplePairStep, tripleTripletStep, tripleTripletStep, tripleTripletStep, tripleTripletStep, tripleTripletStep, tripleTripletStep, tripleTripletStep, tripleTripletStep, and tripleTripletStep. The 'generalTracks' method has a ratio of approximately 50, while all other methods have ratios very close to 1.0. A horizontal line is drawn at Ratio = 1.0.

Number of pileup tracks vs collection
